CS-104 Retrieval Quiz (ANSWER KEY)

Fall 2026 · Week 3, Monday

Name: _____

Closed book, no devices. For questions 1–3, circle the one best answer. For question 4, write your code in the space provided (no algorithm, documentation, or test cases needed).

1.

What does `print('ab' * 3, int(3.9))` display?

a) `ab3 4`

b) `ababab 3` **[correct]**

c) `ababab 4`

d) It raises a `TypeError`

2.

What does this code print?

```
nums = [5, 1, 4]
nums[1] = 9
nums.append(2)
print(nums[1], nums[-1], len(nums))
```

a) `1 2 4`

b) `9 4 3`

c) `5 2 4`

d) `9 2 4` **[correct]**

3.

What does this code print?

```
grades = {'Ana': 88, 'Bo': 75}
grades['Cy'] = 90
del grades['Bo']
print(grades)
```

a) `{'Ana': 88, 'Cy': 90}` **[correct]**

b) `{'Ana': 88, 'Bo': 75, 'Cy': 90}`

c) `{'Ana': 88, 'Bo': 90}`

d) It raises a `KeyError`

4.

Write a code segment that inputs a product name and a year (keep the year as a string), and prints a code made of the first letter of the name in uppercase, followed by the **last two** digits of the year (use indexing). For example, `laptop` and `2026` give `L26`.

Sample solution:

```
name = input("Product: ")
year = input("Year: ")
print(name[0].upper() + year[-2] + year[-1])
```
