CS-104 Retrieval Quiz (ANSWER KEY)

Fall 2026 · Week 1, Wednesday

Name: _____

Closed book, no devices. For questions 1–3, circle the one best answer. For question 4, write your code in the space provided (no algorithm, documentation, or test cases needed).

1.

According to class, which of these is **not** one of the features of an algorithm?

a) Its steps are precise and unambiguous

b) It is finite

c) It must be written in a programming language [correct]

d) It works for a range of possible inputs

2.

What was Grace Hopper's key contribution to programming?

a) The first automatic computing machine

b) The compiler, which converts English-like statements into machine instructions [correct]

c) The first algorithm, to calculate a sum of numbers

d) The punched card, read automatically by a machine

3.

In Thonny, where can you type a single Python statement and see its result right away, without saving a file?

a) The Editor

b) The Variables panel

c) The Shell [correct]

d) The Assistant

4.

A rectangle is 7.5 units wide and 4 units tall. Write Python code that stores the width and the height in two variables, computes the area and the perimeter in two more variables, and prints both.

Sample solution:

```
width = 7.5
height = 4
area = width * height
perimeter = 2 * (width + height)
print("Area:", area)
print("Perimeter:", perimeter)
```
